

讓您彷彿置身於大自然

YOU WILL FEEL LIKE BEING IN NATURE

iS1005-Plasma

You will feel like being in nature

In the early 1900's Albert Einstein's sister was suffering from tuberculosis. The treatment at that time was to take her to a hospital high in the Alps where, remarkably, she made a full recovery. Intrigued, Einstein, along with his good friend Conrad Habicht, set what finding a scientific explanation for this phenomenon. What's discovered the that number of activated oxygen ions at high altitude was much greater that at low altitude. Ion is a natural bio-climate rich in active oxygen molecules so we will feel as clean as the air in nature; high on the mountain tops, in the forest, near a waterfall.

Strongly to kill bacteria and virus, powerful to remove harmful chemical and bad odor

innoclean innoScrubber iS1005 is designed for different environments. Lots of plasma ions are formed as air travel over the innoclean plasma ionization tubes. innoclean Bipolar Ionization creates its own fresh and clean natural bio-climate rich in active oxygen molecules. These ions are moving to attack pollutants such as particle, chemical gas, and bad odor, etc.

Particle Reduction

Airborne particles are charged by the ions through ionic bonding. These charged particles stick together increasing their size then fall to the floor where they are rendered harmless.

Sterilization of mold and bacteria

Oxygen ions inhibit the growth of mold and cause the reduction of bacteria by penetrating the cell's split zone preventing cell division.

Odor Neutralization

Odorous gases and aerosols oxidize on contact with active oxygen molecules. Odors, especially of an organic origin, are quickly eliminated.

VOC and Chemical Control

Volatile Organic Compounds (VOCs) are emitted as gases where there is carpeting, building materials, furniture, office equipment, cleaning agents, paints, glues, solvents or pesticides. The ions trade electrons with these VOCs breaking down their molecular structures into carbo dioxide (CO₂) and water (H₂O).

MAIN BENEFITS

· Particle Reduction · Sterilization of mold and bacteria · Odor Neutralization · VOC and Chemical Control ·

innoScrubber iS1005 - Application

Home, schools, hospitals, animal hospitals, nursing homes, offices, clubs, restaurants, commercial buildings, rest room, workshop, formaldehydevolatile organic compounds VOCs, strong odors and so on.

Specification

Brand	innoclean
Product name	innoScrubber
Model	IS1005-Plasma
Installation	Freestanding with roller
Services Area (ft ²)	600 - 800 ft ²
<u>Purification process by</u>	
Pre-filter	Yes
Plasma ionization	2 x F tube
HEPA filter	Option
Carbon filter	Option
Generators replacement	Every 14000 - 22,000 hours
Air flow (m ³ /h)	380 m ³ /h (Adjustable)
Speed control	1 - 10
Ion control	1 - 3
Direction of air flow	Right to left
Dimensions (H x W x D)	87 x 37 x 25.5 cm
Weight (kg)	20
Power supply	220 V / ~1 / 50 Hz
Power	140W
Made in	China

Bipolar Ionization Series - Suitable Diverse Installation

OceanClean Multi600

PT888-Power

innoScrubber IS1005-Plasma

Air Duct Mount Series

(IC102D / IC102E / IC202E / IC402E / IC402F / IC802E / IC802F / IC1002E / IC1002F)
