

INSTALLATION

The equipment must be installed by a properly trained specialist firm.

This appliance must be earthed.

Install the equipment with the back facing the wall.

Be sure to install the equipment with a base plate or a topple-prevention fitting.

Confirm that the voltage and frequency in your home are the same as that indicated on the equipment before connecting to prevent any hazards.

The equipment must be installed at a location where the power supply cord can be attached easily to prevent electric shock and fire hazards. Never use an extension cord.

Installation location must not be subject to high temperature, high humidity or poor drainage.

The equipment must be placed on a horizontal surface of sufficient strength to support the equipment.

Keep the installed equipment more than 30 cm and 50 cm away from the ceiling and side walls, respectively, and ensure an open space of 100 cm or more at the front.

WARNING

If the equipment does not operate normally, disconnect the power plug, and never try to operate the equipment until it is repaired.

Prior to cleaning or other maintenance, the equipment must be disconnected from the supply mains.

High Voltage is present inside of the equipment. Service must be performed only by trained personnel.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Do not splash water on the equipment.

Do not use a combustible gas near the equipment.

CAUTION

Several watts of electric power are consumed when the main power plug is connected, no matter whether the power switch is turned off or not. If the equipment will not be operated for an extended period, disconnect the plug.

Do not operate the equipment without the pre-filter.

This equipment does not function as a ventilator. If a room-heating device is in use, periodically ventilate the room.

IMPORTANT SAFETY INSTRUCTIONS

READ ALL INSTRUCTION BEFORE OPERATING THE EQUIPMENT

This equipment must be periodically maintained by qualified personnel.

Do not use outdoors. The equipment is designed for indoor use only.

Do not use the equipment for any purpose other than that described in this manual.

Do not immerse power supply cord or plug in water.

Keep power supply cord away from heated surfaces.

Do not insert any objects (such as cigarette butts) into openings in the equipment.

Do not disconnect the plug by pulling the power cable.

Do not damage, pull, twist or bundle power cable, do not place anything heavy on the cable, and never pinch it.

Do not block the exhaust port, during normal operation of the equipment.

If you have any doubt, consult a service agent or qualified personnel.
